**DETAILED ACTION**

1. This Office Action is in response to Applicant's amendment filed June 30, 2008. Claims 1-8 had been previously canceled. Claims 9, 18, 27, 28, 29, and 30 are currently amended. Claims 9-30 are currently pending in this case.

***Response to Arguments***

2. Applicant's arguments with respect to claims 9-30, as currently amended, have been considered but are moot in view of the new ground(s) of rejection.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 9-17 and 30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. Regarding claims 9-17 –

6. Claim 9 discloses a receiver "configured to recover . . . ." Note that the receiver never actually receives, but is merely configured to do so. Further, claim 9 discloses a module "configured to recover . . . ". Once again the module never actually recovers but is merely configured to do so. It has been held that actions that may or may not be done is indefinite and does not distinguish the claim from the prior art. *In re Collier*, 158 USPQ 266 (CCPA 1968).

7. For these reasons, independent claim 9 and its dependent claims 10-17 are rejected under section 112.

8. Regarding claim 30 –

9. Claim 30 discloses “generating a request for decryption” and later “logging receipt of the further encrypted part”. Note that the request is not logged as received nor is the further encrypted part apparently sent. Therefore, claim 30 does not particularly point out and distinctly claim the subject matter which applicant regards as the invention.

***Allowable Subject Matter***

10. Regarding the independent claims 18, and 27-29, as well as dependent claims 19-26, the primary reference, Ginter, discloses as previously discussed. Ginter, however, does not disclose that the receiver facility receives the encrypted data from the key facility and then requests that the key facility decrypt the data thus returning the data to the key facility. Moreover, the missing elements of Ginter are not likely found in a reasonable number of reference(s). Yet even if the missing claimed elements were found in a reasonable number of references, a person of ordinary skill in the art at the time the invention was made would not have been motivated to include these missing elements in an embodiment of Ginter, since normally one would not seek to return the data to where it came from.

11. Claims 9-17 and 30 are likely allowable, if rewritten to overcome the above rejections.

***Conclusion***

12. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

13. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
